APPLICATION

# PRESS RELEASE

**REGARDING THE INFORMATION ON THE ACCOMPANYING DEVELOPMENT FEE  
FOR THE I-DEPOT SUPERAPP@LTA FROM 00:00 ON JULY 07, 2024  
AT GENUINE PARTERS JOINT STOCK COMPANY - DA NANG BRANCH**

**Dear Valued Customers/Partners,**

First and foremost, Logistics Technology Application Joint Stock Company extends our best greetings and wishes to our valued customers. We sincerely thank you for your trust, companionship, and cooperation with our products and services over the past time.

Since the i-Depot SuperApp@LTA application developed by Logistics Technology Application Joint Stock Company was put into operation to replace manual transactions at Genuine Partner Joint Stock Company - Da Nang Branch, it has become a key element in the logistics operation process in general and the activities at the center in particular. The application has significantly improved yard operations, reducing waiting times for drivers, saving travel costs, and ensuring financial transparency for customers and partners using the application.

Moreover, synchronizing two types of accounts, vehicle owner accounts and driver accounts, brings optimal benefits to vehicle owners. Orders are automatically connected from the vehicle owner's account and synchronized with the driver's account to execute orders at the depot, eliminating the need for drivers to log into the vehicle owner's account to view order codes. This is considered a new advancement that helps vehicle owners manage orders, transaction history, drivers, and goods more easily.

For the depot, supervising container lifting/lowering since the i-Depot SuperApp@LTA application was launched has optimized time. It only takes 30 minutes from order activation to complete the operation, from entering the gate to finishing the task. This helps control the number of vehicles entering and leaving stably and reasonably, ensuring the control corridor remains clear, avoiding congestion, and significantly reducing order approval time. This helps drivers no longer have to wait long, creating a comfortable working spirit for the driver team.

Thanks to the support, feedback, and suggestions from our valued customers and partners throughout the operation and upgrade of the application from the beginning until now, the entire yard operation process has been effectively optimized. The driver team expresses satisfaction as they save both time and costs while ensuring transparency in documentation statistics. We will continuously strive to update new market technology trends and apply them in practice to bring the best experience to our customers.

APPLICATION

# PRESS RELEASE

**REGARDING THE INFORMATION ON THE ACCOMPANYING DEVELOPMENT FEE  
FOR THE I-DEPOT SUPERAPP@LTA FROM 00:00 ON JULY 07, 2024  
AT GENUINE PARTERS JOINT STOCK COMPANY - DA NANG BRANCH**

In this improvement phase, starting from 00:00 on July 7, 2024 Logistics Technology Application Joint Stock Company continues to upgrade the quality of the i-Depot SuperApp@LTA application at Genuine Partner Joint Stock Company - Da Nang Branch. This aims to perfect existing features and develop and upgrade advanced features towards integrating the mobile ecosystem to bring maximum benefits, significantly saving time and costs for drivers and all customers when using our depot services.

By accompanying the i-Depot SuperApp@LTA application with a fee of 20,000 VND per container lift/lower order at Genuine Partner Joint Stock Company - Da Nang Branch (this can be a single order or a sub-order of a total order; the technology infrastructure fee will be collected by Logistics Technology Application Joint Stock Company), our valued customers and partners have contributed to Logistics Technology Application Joint Stock Company's mission to bring common benefits to all customers using the i-Depot SuperApp@LTA application, bringing us closer to modern utility services in the future.

Through this press release, Logistics Technology Application Joint Stock Company hopes that our valued customers and partners will accompany us in the digital transformation of the logistics industry. The benefits that digitization brings will surely be a strong foundation for all of us amidst the rapid changes of the market. The company will always listen to and appreciate all feedback from our valued customers and partners to continuously improve the quality of our services and products to serve our customers in the best way.

***Your success is our success!***
